

EXECUTIVE SUMMARY

Salesforce-certified, consulting manager with over 7 years of experience turning complex enterprise challenges into optimized operational efficiency and measurable business growth. Recognized for inspiring those I work with and blending strategic thinking with hands-on problem solving to bridge the gap between executive vision and technical execution, especially in Sales Cloud, FSC, Revenue Cloud, & Data Cloud. I turn complexity into clarity when orchestrating within the Salesforce ecosystem, effectively unblocking progress across Sales, Operations, GTM, AI, Accounting and Finance. Proven track record of delivering innovative Salesforce solutions and AI transformation that consolidate technical debt, drastically compress cycle times, and orchestrate complex integrations, empowering organizations to achieve their strategic objectives and drive revenue.

PROFESSIONAL WORK EXPERIENCE

BKT Advisory – Various Locations, Worldwide

Salesforce & AI Consultant

Jan 2025 – Present

Direct enterprise-grade Salesforce and AI transformations for startups and mid-market firms, aligning technology delivery directly to commercial growth objectives.

- Independently secured 4 enterprise contracts (including Berkshire Hathaway), achieving an average 15% annualized reduction in technology and software overhead across the client portfolio through platform consolidation and strategic vendor audits.
- Increased lead conversion from 5% to 20% and reduced lead abandonment/drop-off by 35% by automating follow-up (SMS/email + calendar scheduling) and building bi-directional SalesRabbit and Gong integrations with Salesforce via the Sales Cloud mobile app.
- Orchestrated a multi-model AI lead intake ecosystem (Salesforce Agentforce, OpenAI, Gemini), reducing response times by ~90% (from an average of 24+ hours to under 10 minutes) to replace manual administrative intake for clients such as West Coast Spine Center.
- Architected and deployed a proprietary **Project Estimator** application (Claude, Codex, React, Supabase), reducing administrative scoping overhead by over 50% and compressing SOW generation time from 8 hours down to under 1 hour.
